

# Recall of Pendant Light Fixtures Due to Impact Hazard

This recall involves Swarovski Octa Crystal Pendant light fixtures. The single and triple pendant fixtures come in black and white. The pendant light fixture measure about 15 centimeters tall by 8 centimeters wide by 8 centimeters long. The light fixtures hang from a 150 centimeter electric cord and fixture canopy. The model numbers are A9950NR700122, A9950NR700123, A9950NR700128 and A9950NR700129 printed on the product label inside of the fixture canopy. The Swarovski Octa Crystal Pendant light fixtures were sold at leading lighting retail showrooms from May 2009 through January 2016.

Some Octa Crystal Pendant light fixtures may have been damaged by its packaging during shipment. If that is the case, the crystal in the light fixture can detach and fall, posing an impact hazard. Swarovski has received reports of the crystal detaching from the light fixture and falling. No injuries have been reported.

Swarovski's first priority is the quality and safety of its products. Swarovski is therefore conducting a voluntary recall, whereby it inspects all potentially affected Octa Crystal Pendant light fixtures and replaces Octa Crystal Pendant light fixtures that were damaged by its packaging during shipment.

Consumers are asked to contact Swarovski International Distribution AG at +423 399 56 56 from 8:30 a.m. to 5:00 p.m. CET or by email to [lighting.europe@swarovski.com](mailto:lighting.europe@swarovski.com) to schedule a free inspection. In the interim, consumers should prevent people from walking underneath the light fixture. Following inspection, if the light fixture was damaged during shipment, a replacement Octa pendant light fixture excluding the canopy will be provided free of charge. No repair is necessary for undamaged Octa pendant light fixtures.
